### DATA SHEET\*

Producer	Samsung
model code	DV90M5000QW
Capacity	9 kg
Template	A condensation
Energy efficiency class	A ++
Annual energy consumption (kWh / year) **	258
Type	Automatic
Program Energy consumption (kWh):	
- standard cotton at full load	2.20
- cotton at partial load standard	1.12
Energy consumption mode off / stand-by (W)	0.5 / 5
Duration standby mode	10 min.
<b>standard cotton program 1</b>	
Duration weighted standard cotton program at full load and partial load	156 min.
Program Duration:	
- standard cotton at full load	190 min.
- cotton at partial load standard	130 min.
<b>condensation efficiency class 2</b>	B
Medium Condensation efficiency program:	
- standard cotton at full load	81%
- cotton at partial load standard	81%
weighted condensation efficiency standard cotton program at full load and partial load	81%
Noise level dB (A)	65

\* Conforms to Delegated Regulation (EU) No. 392/2012.  
 • The standard program for cotton fabrics used at full load and partial load is the standard drying program to which they relate the label and the product sheet. This program is suitable to dry wet laundry of regular cotton and is the most efficient in terms of energy consumption for cotton.  
 \*\* Based on 160 cycles of asciugatura the standard program for cotton fabrics at full load and partial load and consumption of the low power consumption modes. Actual energy consumption per cycle will depend on how the appliance is used.  
 • to A (most efficient) On a scale from G (least efficient).  
 \*\*\* They make use of the Smart Sensor Drying sensors both for the drying of cotton garments both for the drying of synthetic garments.
