* Conforms to Delegated Regulation (EU) No 1061/2010. The standard programs at 60 ° C and 40 ° C for cotton fabrics are standard washing programs to which refer the information on the label and on the card. These programs are suitable for washing cotton laundry that has a normal soil and are the most efficient in terms of combined energy and water consumption.

** Consumption based on 220 standard washing cycles for programs for cotton fabrics at 60 ° C and 40 ° C at full load and partial load and consumption of the low power consumption modes. The actual consumption depends on the operation of the unit.
