* Compliant with Delegated Regulation (EU) No. 1061/2010. The standard programs at 60 ° C and 40 ° C for cotton fabrics are standard washing programs to which the information on the label and on the card refers. These programs are suitable for washing normally soiled cotton laundry and are the most efficient in terms of combined energy and water consumption.

** Consumption based on 220 standard washing cycles for programs for cotton fabrics at 60 ° C and 40 ° C at full and partial load and consumption of the low energy consumption modes. Actual consumption depends on how the appliance is used.

*** Depending on the model, the number of rinses varies from 1 to 5.
